Introduction

This publication is a summary of Vital Statistics of the Province of Alberta for 1980, as of February, 1983.

Only events which took place in Alberta are included. This is as opposed to Statistics Canada figures which are adjusted to exclude events to non-Alberta residents in other Provinces.

Tables were generated from the Vital Statistics computer system. I wish to thank the Planning Secretariat for their assistance in compiling this review.

To ensure receiving future copies of this Annual Review, please complete and return the enclosed leaflet.

S. William Gilroy
Director
Division of Vital Statistics
Alberta Social Services and
Community Health

Errata:

The second line in the second paragraph should read...

This is as opposed to Statistics Canada figures which are adjusted to exclude events to non-Alberta residents and include events to Alberta residents in other Provinces.

* Alberta Municipal Affairs Official Population List, 1980.

1 Birthrate is very low in Lloydminster because the hospital is located on the Saskatchewan side of the border. Therefore, births to Alberta residents in hospital are not recorded as Alberta events, but will be included in the Statistics Canada figures when out-of-province events are added. This may also affect the death rates as deaths occurring in the hospital would be recorded in the same manner.

GLOSSARY OF TERMS

Vital Statistics:	Records dealing with births, deaths, marriages and adoptions: all events which have to do with an individual's entrance into or departure from life, together with changes in civil status.
Live Birth:	A complete expulsion or extraction from the mother, irrespective of the duration of the pregnancy, of a foetus in which, after expulsion or extraction, there is breathing, beating of the heart, pulsation of the umbilical cord or definite movement of a voluntary muscle, whether or not the umbilical cord has been cut or the placenta is attached.
Stillbirth:	Foetal death of at least 20 weeks gestation or 500 grams weight.
Gestation:	Time between the conception and birth of an infant, the usual length being 40 weeks.
Wedlock:	For purpose of this report, in-wedlock means that the parents of the child are married to each other at the time of the birth, or are subsequently married and have changed the birth registration.
Birth Order:	Number of live births to the mother, including this birth.
Infant Death:	Death of a child between birth and one year of age.
Neo-natal Death:	Death of an infant 28 days of age or less.
Natural Increase:	Excess of births minus deaths.
